Session 2021-22
GRADE -IV

SUMMER VACATIONS ARE HERE!

HUM HONGE KAAMYAAB! WE WILL TRIUMPH!

Dear Children,

The last year has carried us through new experiences that we would have never imagined before. Online classes, learning PowerPoint and Microsoft word, and making videos. Wearing masks and keeping social distance for our safety.

The world has changed dramatically. It has been a trying time, a painful time for those who had to battle Covid, but through all this, our resolve to do well, our spirit of winning will come through.

Remain strong, responsible, motivated, cheerful and empathetic towards all.

Keep yourself busy constructively with the 'Goenkan Holiday Engagement'!
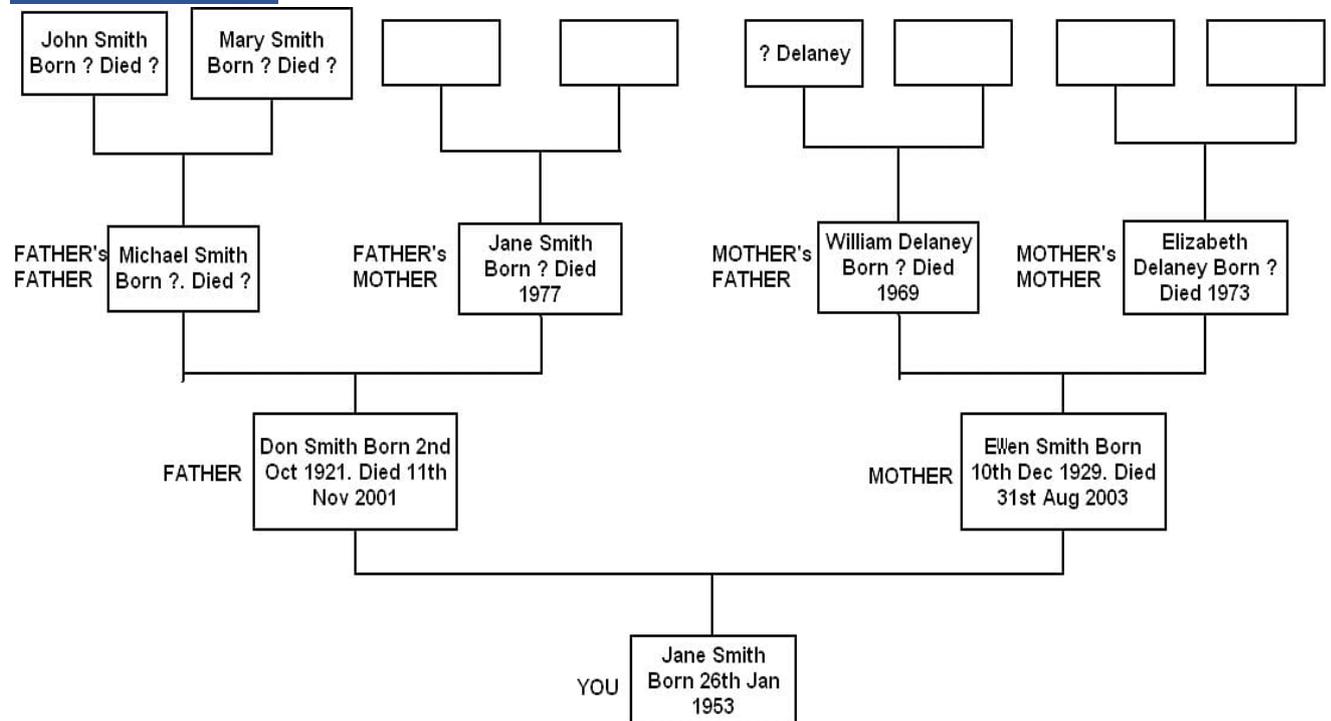

Be safe and God bless

Thank you

Dear Children

YOU — Jane Smith Born 26th Jan 1953

Children will make this on chart paper or on their computers using a template. They can go back as many generations as they want depending on how complex they want the family tree to be. It's interesting to learn the names, ages and relationships in one's family – going back to great grandparents, granduncles and aunts. Go through old pictures and add those too if possible.

A family tree is the most common form of visually documenting one's ancestry. Most family trees include a box for each individual and each box is connected to the others to indicate relationships. In addition to an individual's name, also mention date of birth, birthplace, and other information, depending on the desired complexity of the family tree diagram. You can find many resources online to create a family tree.
